

**Matchmaking Program 2009
Growing Your Business in Latin America**

at

AWS Weldmex/Fabtech/Metalform Mexico

Sponsored by: CAINTRA (Monterrey Chamber of Industry)

When: June 2-4, 2009 – 2:00 pm - 8:00 pm each day

Where: Cintermex Exposition Center – Monterrey, Mexico

During the **AWS Weldmex/Fabtech/Metalform Mexico Expo**, CAINTRA will arrange for exhibitors to hold one-on-one meetings with potential distributors, end-users and outsource manufacturing companies. CAINTRA has over 5,500 member companies in the state of Nuevo Leon, considered the most important financial, commercial and industrial center of Mexico's North Region.

Each CAINTRA **member company/end-user** will have their own area to conduct meetings with exhibitors to discuss business. Those exhibitors interested in meeting with **distributors** will need to provide a detailed profile of your company to a CAINTRA representative in order to find and select potential distributor meetings during the show.

In advance of these one-on-one meetings, there will also be a link to the show website where exhibitors can select companies to meet with during the show. A CAINTRA representative will then approach the member company to see if there is a need for the product/service offering.

Exhibitors approved by CAINTRA will have 15 minutes to meet with the global sourcing manager to discuss potential business relationships.

In addition to these pre-scheduled one-on-one meetings, the show website will also have a discussion area where exhibitors and attendees can post questions in advance of the show to promote networking while at the show.

We are encouraging all parties to use these services with the utmost care and confidentiality as we want everyone to have a valued experience during our event.

To find out more, to schedule appointments, or to find out what companies are interested in meeting with your business, contact:
